

## TYPICAL WIRING

# WDH-31-530

- 16 protection functions
- 5 programmable digital inputs
- 4 programmable relay outputs
- Intelligent Human-machine interface
- SOE record
- FSTN/TFT LCD display module optional

## MODEL

### WDH-31-53

Communication protocol	Control mode	Current specification of protection controller	Main circuit voltage	Optional functions
1(1 Modbus-RTU/Display integration)	A: Direct start	5A	AC400V	V: Anti voltage sag/ Low voltage restart
2(1 Profibus-DP+1 Modbus-RTU)	B: Bi-directional start	25A	AC660V	
3(1 Modbus-RTU)	C: Double speed start	100A	AC100V	
4(2 Modbus-RTU)	D: Resistor divider start	300A		
7(1 Modbus-RTU/1 Modbus-TCP/IP)	E: Y/ Δ start	500A		
9(1 Modbus-RTU/1 Profinet)	H: Autotransformer start	800A		
	K: Protection mode			
	R: Start with soft-starter			
	P: Start with inverter			

Adjustable range	Configurable Motor Power	Diameter
0.2A~5A	5A	Φ10.5mm
5A~25A	25A	Φ10.5mm
25A~100A	100A	Φ18mm
>100A	5A	Φ10.5mm+3pcs of external CT XA:5A

## FUNCTION

<b>Measurement function</b>	Three-phase current	■
	Current unbalance	■
	Thermal capacity	■
	Residual current (grounding) 0.3Ie~8.0Ie	■
	Residual current (leakage) 50mA~5000mA	■
	Three-phase voltage	■
	Positive & negative sequence current	■
	Power and energy	■
<b>Real-time clock</b>	Year, month, day, hour, minute, second	■
<b>Digital input</b>	Dry contact (built-in DC 24V)	5 channels
<b>Relay output</b>	Control relay	3 channels
	Signal relay	1 channels
<b>Analog output</b>	1 channel of DC 4-20mA analog output, parameter programmable	■
<b>Maintenance information</b>	Alarm information/fault record	■
	Start/stop record, switch status changing record	■
	Operation times, total operation time and total shutdown time	■
<b>Display mode</b>	LED display (operate/fault indicate)	■
	LCD display (operation status, fault information, parameter setting, etc)	■
<b>Installation mode</b>	Controller main body	Mounted on 35mm DIN-rail
	Display module	Panel mounting, (92*55)mm
<b>Communication function (Select any one)</b>	1 (1 Modbus-RTU/Display integration)	□
	2 (1 Profibus-DP+ 1 Modbus-RTU)	□
	3 (1 Modbus-RTU)	□
	4 (2 Modbus-RTU)	□
	7 (1 Modbus-RTU/1 Modbus-TCP/IP)	□
	9 (1 Modbus-RTU/1 Profinet)	□

NOTE: ■: Yes □: Optional

<b>Protection function</b>	Overload inverse time protection	■
	Start acceleration timeout protection	■
	Locked rotor (starting overcurrent) protection	■
	Blocking (operation overcurrent) protection	■
	Leakage protection	■
	Voltage/current unbalance/phase failure protection	■
	Underload/undercurrent protection	■
	Overvoltage protection	■
	Undervoltage protection	■
	Phase sequence protection	■
	PT disconnection protection	■
	Residual current (grounding) (0.3~8.0) Ie protection mode	■
	Residual current (leakage)(50~5000)mA	■
	External fault protection (process interlocking)	■
	tE time protection (increased safety motor)	□
<b>Control protection</b>	Protection mode	■
	Direct start	■
	Bi-directional start	■
	Double speed start	■
	Y/ Δstart	■
	Resistor divider start	■
	Autotransformer start	■
	Start with soft-starter	■
	Start with inverter	■
	Anti voltage sag(low voltage restart)	□
Power-on automatic start	■	

## FUNCTION

<b>System operating parameter</b>	Motor rated voltage	AC400V, 50Hz
	Motor rated current	0.1A~800A
	Insulation resistance	> 100MΩ
<b>Controller auxiliary power</b>	Working range	AC/DC 80V~270V
<b>Ambient condition</b>	Operating temperature	-20℃~60℃
	Relative humidity	≤93%RH
	Protection degree (Panel)	IP64
	Notice	No explosive medium, metal corroding gas and conducting medium at site
<b>Protection action accuracy</b>	Current/voltage start value	±2% of the set value
	Accumulated value of thermal capacity	±1% of the set value
<b>Action delayed time</b>	Action delayed time set value < 2s	±100ms
	Action delayed time set value ≥ 2s	±5%
<b>Relay output</b>	Control relay output contact capacity	AC250V/5A
	Signal relay output contact capacity	AC250V/3A, DC30V/3A
	Service time of relay output	100000 times
<b>EMC</b>	Electrostatic discharge test	Severe degree: Class III
	Electrical fast transient burst immunity test (EF)	Severe degree: Class III
	Surge	Severe degree: Class III
	Oscillatory waves immunity	Severe degree: Class III
	Radiated radio-frequency electromagnetic field immunity (RF-EMS)	Severe degree: Class III
	Radio frequency radiation immunity	Severe degree: Class III
	Power frequency immunity	Severe degree: Class A
	CE limit test	150kHz~30MHz
	Conducted emission limit test	30MHz~1000MHz
<b>Withstand voltage</b>	Between power supply and input	AC2kV/1 min
	Between power supply and output	AC2kV/1 min
	Between input and output	AC1kV/1 min

NOTE: ■: Yes □: Optional

## DIMENSIONS

Controller installation (5A/25A perforated connection)

Controller installation (100A perforated connection)

Display panel installation

Thermal relay

- Under the thermal relay mode, WDH does not participate in the start and stop operation of motor (DI terminal and panel control are invalid).
- The start/stop running of the motor must implement by the Start/Stop external button
- As drawing shown, press the start button SB2, motor start, press stop button SB1, motor stop
- Protection trip relay 1DO is NC contract, when fault was detected, 1DO open, contactor(KM) off, motor will stop
- After fault reset, 1DO closed, allow the motor start again.

Direct start

- Under the direct start mode, WDH controls the motor start/stop by relay 1DO(NC)/2DO(NO).
- As drawing shown, when the controller receive the start command(such as 3DI terminal or display interface), 2DO closed(pulse), contactor(KM) power on, motor start
- When the controller receives the stop command(such as 5DI terminal or display interface), 1DO open(pulse), contractor KM power off, motor stop.
- When faults were detected, 1DO open(level), contractor KM power off, motor stop.
- After reset, 1DO closed, controller allows the motor restart again.
